## PROFESSIONAL EXPERIENCE

### **GourmetJS, Inc** — *Founding Engineer*

MAR 2016 - AUG 2016

Created the company website pages and blog using Jekyll and Github Pages, as well as promoting the site itself through several marketing channels, generating over 3,000 page views

Built two Javascript projects, including a blog page that used isomorphic Javascript, and a command line tool that returned a recursive directory tree

### **FreshEats, LLC** — *Founder & CEO*

JULY 2015 - FEB 2016 | [Local Press Release](#)

Managed the company branding as well as the remote development of a Ruby on Rails ecommerce web app that went on to process about 10 orders per hour at its peak

Maintained the overall marketing presence of the company through social media, demographics targeting, email campaigns, and other user retention and acquisition methods, resulting in over 160 user accounts being created, over \$1,600 in processed orders, and over 5,000 page views in the first 3 months of operation

Coordinated logistics for deliveries, including the hiring, scheduling, and dispatching of 5 delivery drivers

Configured staging and production servers for application deployment, and utilized AWS best practices for networking and credentials management

### **Event Management (independent)**— *Host & Promoter*

SEPT 2013 - JAN 2016

Generated over \$15,000 in revenues from promoting holiday events and organizing charity poker events and networking events

## PROJECTS

### **Nucleus Dispatch** — *Route optimization system*

Led team to develop a route optimization prototype, including a geolocation iPhone app, web dashboard, and route optimization API

Designed database models and built prototype REST API for entire system

### **Campus Cleaners** — *Class business plan competition*

Pitched a preliminary business concept and was chosen as 1 of 8 to proceed past the preliminary rounds, out of 40 pitches

Constructed a business plan and led a team of 4 to the finals to compete for a grand prize seed investment of \$5000
